PROFESSIONAL SUMMARY

Senior AI Engineer and Full-Stack Developer with 10+ years of experience building scalable web applications, cloud-native systems, automation solutions, and AI-powered products. Experienced in LLM applications, RAG, AI agents, semantic search, prompt engineering, and workflow automation using Python, TypeScript, React, Node.js, and modern AI frameworks. Skilled in designing production systems with AWS/Azure, APIs, databases, Docker, CI/CD, and cloud infrastructure, delivering reliable solutions from architecture through deployment and support. Experienced in leveraging AI-assisted development tools such as ChatGPT, Claude, Cursor, and GitHub Copilot to improve engineering productivity and software quality.

CORE SKILLS

Generative AI : LLMs, OpenAI/Anthropic-style APIs, prompt engineering, structured outputs, RAG, semantic search, AI agents, agentic workflows
ML / DL: Python, PyTorch, TensorFlow, model design, algorithm development, training, evaluation, optimization, CatBoost
NLP / Language AI: Filipino embeddings, task-oriented language models, multilingual NLP, text generation, report analysis, semantic understanding
Automation & AI Apps : AI scripting, workflow automation, API integrations, webhooks, data processing, internal tools, business-process automation
Backend / APIs : FastAPI, Flask, Django, Node.js, Express, TypeScript, REST APIs, microservices, PostgreSQL, MongoDB, Redis
Cloud / MLOps : AWS, Azure, GCP, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD, deployment and monitoring
Computer Vision / Data: Computer-vision pipelines, visual analysis, Pandas, NumPy, data/ML pipelines, feature engineering, simulation
Math / Data Science: Mathematical modeling and optimization, data science, computer simulation of material properties, feature engineering, practical problem solving
Engineering / Leadership : System design, architecture, testing, debugging, documentation, project management, mentoring, stakeholder communication

PROFESSIONAL EXPERIENCE

Senior Full Stack & AI Engineer
04/2021 - 06/2026
UniqCare
Remote, US

- Built AI-enabled product capabilities combining LLM APIs, RAG, semantic search, prompt engineering, and backend services for production workflows.
- Designed document ingestion and retrieval flows covering chunking, embeddings, metadata-aware search, context assembly, and response generation.
- Developed Python/FastAPI and Node.js services exposing AI capabilities through secure APIs and integrating AI features with product experiences and business systems.
- Worked with private LLM infrastructure using Ollama/vLLM; evaluated model and prompt behavior for correctness, latency, reliability, and output consistency.
- Containerized and deployed AI services with Docker/Kubernetes across cloud environments, integrating CI/CD, monitoring, logging, IAM/RBAC, and troubleshooting.
- Led architecture decisions, testing, documentation, code reviews, and mentoring while collaborating with technical and non-technical stakeholders.

Full Stack / Cloud & Automation Engineer
07/2016 - 03/2021
ReeyaTek Solutions
Sulu, Philippines

- Built full-stack, cloud, automation, and data-processing solutions using Python, JavaScript/TypeScript, React, Node.js, APIs, SQL/NoSQL databases, and cloud infrastructure.
- Developed ML prototypes and production-oriented integration patterns using Python, PyTorch/TensorFlow, CatBoost, feature engineering, and model evaluation.
- Implemented cloud-native services and deployment workflows across AWS, Azure, and GCP using Docker, Kubernetes, Terraform, GitHub Actions, and Jenkins.
- Worked across software engineering, AI, automation, data, and project coordination to prototype, integrate, test, and refine practical solutions.

SELECTED PROJECTS

- **LLM / RAG Platform:** Built production AI workflows covering document ingestion, chunking, embeddings, metadata-aware retrieval, context assembly, and LLM response generation using Python/FastAPI and LLM APIs

- **AI Agents & Automation:** Developed AI-enabled workflows using LLM APIs, structured outputs, AI agents, API integrations, webhooks, and business-process automation.

- **Semantic Search & Vector Retrieval:** Implemented semantic-search solutions using embeddings, vector retrieval, metadata-aware search, and context assembly for AI-powered applications.

• **AI Evaluation & Monitoring:** Evaluated LLM and prompt behavior for correctness, latency, reliability, output consistency, and production quality using private LLM infrastructure with Ollama/vLLM.

• **ML Prediction & Optimization:** Developed ML prototypes using Python, PyTorch, TensorFlow, CatBoost, feature engineering, and model evaluation for production-oriented machine-learning workflows.

• **NLP & Computer Vision:** Worked on Filipino-English language AI, task-oriented language models, multilingual NLP, text generation, semantic understanding, computer-vision pipelines, and visual analysis.

EDUCATION

Bachelor of Science in Computer Science | Sulu State University | 2012 - 2016 English: Fluent | Filipino: Native
University focus: Mathematical Modeling & Optimization • Design and Manipulation of ML Algorithms • Machine Translation
