PROFESSIONAL SUMMARY

Senior Full Stack Developer with 10 years of experience building scalable, real-time, and AI-enabled platforms using React, TypeScript, Node.js, Python, and AWS. Proven success transforming complex operational workflows into secure applications, high-throughput APIs, automation services, and data-driven interfaces. Experienced in production ownership, performance optimization, cloud deployments, and cross-functional delivery for remote international teams.

CORE SKILLS

Frontend & Real-Time
React, React Native, Expo, TypeScript, JavaScript, Next.js, Vue.js, Vite, responsive UI, reusable components, Tailwind CSS, Redux, REST APIs / GraphQL, Socket.io, WebSockets

Backend & Data
Node.js, NestJS, Express.js, Python, PHP, Laravel, REST APIs, GraphQL, PostgreSQL, Prisma, Sequelize, TypeORM, Drizzle ORM, Redis, MongoDB

AI & Automation
OpenAI API, RAG architecture, NLP, automated document processing, audio transcription, workflow automation

Cloud & Delivery
AWS, Docker, Kubernetes, Terraform, Git, CI/CD, testing, monitoring, production troubleshooting, Supabase, Firebase

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer
04/2021 - 06/2026

UniqCare *Remote, US*

- Architected and maintained five HIPAA-compliant patient-management platforms, translating complex service workflows into secure React/Next.js and React Native interfaces backed by scalable Node.js services, PostgreSQL, and Redis.
- Designed high-throughput microservices and REST APIs, improving performance and operational reliability through Redis caching, PostgreSQL indexing, and production-focused debugging.
- Led a data-driven A/B testing program using statistical interpretation of GA4 data to identify friction and reduce user drop-off across critical funnels.
- Engineered an OpenAI-powered RAG chatbot for 24/7 patient triage and automated response handling, reducing dependence on manual support and accelerating access to relevant information.
- Built Python services for automated PDF extraction and audio transcription using NLP, converting document-heavy processes into reusable, production-ready workflows.
- Owned features from requirements through release while collaborating with product and operational stakeholders in a compliance-sensitive, distributed environment.

Full Stack Developer
07/2016 - 03/2021

ReeyaTek Solutions *Sulu, Philippines*

- Built React, Next.js, and Vue.js applications with reusable components and clear loading, empty, validation, and error states across multiple client products.
- Developed secure Node.js, Express, and Laravel APIs with Stripe, PayPal, Amazon Pay, and third-party integrations supporting reliable operational and transaction workflows.
- Implemented real-time communication and two-factor authentication using Socket.io and Twilio, strengthening service continuity and reducing fraudulent transactions.
- Managed AWS infrastructure with Terraform and automated CI/CD pipelines, supporting containerized deployments and 99.99% uptime.
- Optimized background jobs and multi-threaded processing in Java and Node.js to improve throughput, stability, and execution of operational workloads.

EDUCATION

Bachelor of Science in Computer Science | Sulu State University | 2012 - 2016 English: Fluent | Filipino: Native
